SUMMARY

Engineering student specialising in Intelligent Systems with strong experience in software engineering, artificial intelligence, and data-driven systems. Passionate about using technology to build meaningful and engaging digital experiences, particularly in interactive and game-based environments. Seeking an internship where I can contribute and grow as a developer.

WORK EXPERIENCE

Research Intern @ CNRS / Sorbonne Université Sept 2024 – Jan 2025

5-month research internship at the Jean le Rond d'Alembert Institute, focusing on the nonlinear mechanics of geological folds. I have developed advanced **Python-based image analysis tools** to accurately track and quantify elastic deformations in experimental setups. My work is contributing widely to a **research article currently in preparation for publication**.

Academic Tutor @ Isae Supméca 2023-2024

Supported middle and high school students from underprivileged backgrounds (ZEP) through personalized tutoring in math, physics, and computer science.

EDUCATION

2025 – 2026 Sorbonne Université, Paris – Double Degree in Intelligent Systems
Specialisation in Robotics, Artificial Intelligence and Advanced Control.

2023 – 2026 ISAE–Supméca Paris – Engineering School in Mechanics and Systems Design
Core studies in Mechanics, Numerical Methods, Applied Mathematics and Computer Science.

2020 – 2023 ENCPB Paris – Preparatory Classes for Top French Engineering Schools
Intensive coursework in Mathematics, Physics and Chemistry, developing strong analytical and problem-solving skills.

2020 Lycée Français Gustave Flaubert (AEFE Network), La Marsa, Tunisia –
Scientific Baccalaureate (High Honours)
Specialisation in Physics and Chemistry.

PROJECTS

Let's Not Cook Together — Unity Game Project

Design and development of an original multiplayer game built with Unity, inspired by *Let's Cook Together*, featuring a sabotage-based gameplay mechanic.

SKILLS

Programming:	Python , MATLAB, C, C++, Java, LaTeX
Engineering Tools:	SolidWorks, CATIA, Cameo Systems Modeler
Office Tools:	Microsoft 365, Google Workspace, Git, VSCode
Languages:	Fluent in English (TOIEC : 940/990), Beginner in German and Learning Arabic
