SUMMARY

I study deep learning, with a particular interest in AI Safety. I am completing an M2 in Intelligent Systems at Sorbonne Université and looking for a research internship or any related research position before pursuing a PhD in artificial intelligence.

WORK EXPERIENCE

Data Analyst Internet @ Papernest Jun 2026 – Oct 2026

Research Intern @ CNRS / Sorbonne Université Sept 2024 – Jan 2025

5-month research internship at the Jean le Rond d'Alembert Institute, focusing on the nonlinear mechanics of geological folds. I have developed advanced **Python-based image analysis tools** to accurately track and quantify elastic deformations in experimental setups. My work contributed widely to a **research article currently in preparation for publication**.

Academic Tutor @ Isae Supméca 2023-2024

Supported middle and high school students from underprivileged backgrounds (ZEP) through personalized tutoring in math, physics, and computer science.

EDUCATION

2025 – 2026 Sorbonne Université, Paris – Double Degree in Intelligent Systems
Specialisation in Deep learning with application in audio and image processing, introduction to research.

2023 – 2026 ISAE-Supméca Paris – Engineering School in Mechanics and Systems Design
Core studies in Mechanics, Numerical Methods, Applied Mathematics and Computer Science.

2020 – 2023 ENCPB Paris – Preparatory Classes for Top French Engineering Schools
Intensive coursework in Mathematics, Physics and Chemistry, developing strong analytical and problem-solving skills.

2020 Lycée Français Gustave Flaubert (AEFE Network), La Marsa, Tunisia –
Scientific Baccalaureate (High Honours)
Specialisation in Physics and Chemistry.

PROJECTS

A force master curve for the wrinkle-to-spiral transition of confined sheets

Extended the linear-elastica description of a confined buckled elastic sheet (Deboeuf, Protière & Katzav, *Phys. Rev. E*, 2024) into the large-deformation regime, where the linear model no longer reproduces the experimental observations.

SKILLS

Programming: **Python**, PyTorch, JAX, C, C++, GIT, LaTeX

Office Tools: Microsoft 365, Google Workspace, Git, VSCode

Languages: Fluent in English (TOIEC : 940/990), Beginner in German and Learning Arabic
